DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to a diverter which is movable along the length of the conveyor, classified in class 198, subclass 364.
 - II. Claims 4-10, drawn to a sliding support for an endless belt, classified in class 198, subclass 841.
 - III. Claims 11-13, drawn to a roller guide for an endless belt, classified in class 198, subclass 842.
 - IV. Claims 14-17, drawn to a tensioner for an endless belt, classified in class 198, subclass 813.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of each group has separate utility such as a conveyor, which does not require the subject matter of the other three groups. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3651

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
